COMPANY BIO

Founded and led by a Special Forces Engineer, Dreng Solutions is a premier design-build and general contracting firm specializing in commercial and roadway construction. We bring elite military precision to the federal contracting landscape, engineering multi-phase structural solutions that directly align with our clients' most critical mission parameters. By merging operational discipline with absolute pricing transparency, we ensure every asset we deliver provides maximum value, meets rigid compliance standards, and guarantees project success.

CORE COMPETENCIES

- **Commercial Construction:** Full-lifecycle vertical construction and secure facility placements, managing every phase from foundational civil work and heavy-lift logistics to the final architectural envelope.
- **Roadway Construction:** Advanced infrastructure development, encompassing heavy paving, structural alterations, and resilient municipal transit networks engineered to withstand high-volume loads.
- **Excavation & Site Preparation:** Precision earthwork, deep-trench civil utility routing, and secure site operations designed to establish flawless structural foundations and mitigate environmental risk.
